

Emergency Medical Responder (EMR) Course

The EMR course will teach you the skills needed to treat injured trauma patients, the skills needed to care for patients experiencing illness or serious medical problems.

The EMR is a key element in providing emergency care and is often the first medically trained person to arrive on the scene of an emergency. Your initial care is usually followed by Emergency medical technicians (EMTs) or other health professionals.

All emergency medical skill levels from EMT Basics to Paramedics are based on what is learned in the EMR course. The skills and knowledge learned in this EMR course will provide the foundation for the entire EMS System.

Basic goals of EMR aim to teach you how to evaluate, stabilize and treat patients using a minimum of specialized equipment, how to improvise and how to help EMTs and Paramedics when they arrive on scene and how to operate in a variety of settings.

EMR Schedule

Station 83 - Marble

Day	Date	Start	End	Topic	Chapters
