

## Basic Firefighter Course

The Basic Firefighter program is designed to provide recruit firefighters with some of the basic knowledge and skills necessary to help them function as members of a fire department.

The skills included with this program are based on the Job Performance Requirements of NPFA 1001-2002, *Standard for Professional Qualifications for Firefighter I*. However, this course does not meet the requirements of the Colorado Division of Fire Prevention and Control eligibility for Firefighter I and/or II certification.

The mission of the fire service is to reduce loss of life and property, offer quality service and maintain fiscal balance while tactical priorities of the fire service include life safety, incident stabilization and property conservation.

## Basic Firefighter Schedule

### Station 83- Marble

Day	Date	Start	End	Topic	Chapter(s)
