HYDROSPHERE TECHNOLOGY

Leading-edge technology causes water to surround the fabric, rather than saturate it. The hydrospheric effect optimizes the swimmer's position in the water, thus reducing drag and maximizing speed and efficiency.

SPEED DRY FABRICATION

Proprietary coating repels water and keeps the suit dry and compressive, keeping swimmers lightweight and fast.

SUPERSONIC FLEX BONDING

Advanced engineering allows fully bonded seams to conform and stretch with the swimmer's body, resulting in a precisely fitted, ultra compressive suit that won't restrict natural movement.

HOW TO MEASURE:

A CHEST: Measure around the fullest part of your bust.

B WAIST: Measure around the narrowest part of your waist.

C HIPS: Measure around the widest part of your hips.

D TORSO: Measure diagonally from your shoulders, between your legs and up your back to return to the starting point.

***NOTE:** For all measurements, make a full loop around with the tape. For chest, waist, and hips, keep the tape parallel to the floor.
